The heart of the **Coral Triangle**

Raja Ampat, **“the Four Kings”**, is an archipelago of more than 1,500 islands and cays off the northwestern tip of West Papua, Indonesia. According to Conservation International, it holds the **highest marine biodiversity recorded on Earth**. In the south, **Misool** is one of the most pristine reef systems left, one of the few places in the world where biodiversity is increasing rather than declining. On board the **Emperor Harmoni** we combine pelagics, macro and untouched reefs: from pygmy seahorses to oceanic mantas.

A JOINT EXPEDITION

Two friends, **one trip**

Carlos Donoso, owner of Carlu Dive Travel, and **José Ugarte**, owner of Dive Spot, have been friends for more than 10 years. We did our Divemaster together on **Koh Tao**, Thailand, and built a friendship that has stood the test of time.

We have been **collaborating for 4 years**, working side by side. After running several trips separately, we decided to do this one together.

We believe this trip will take us back to where we met: once it ends, we will head to Koh Tao to celebrate the Thai New Year on the island where it all began.
